

STUDENTS SERVING STUDENTS PROJECT: PREPARATION

With what group of youth or students am I going to work?

When will I meet with these youth to plan the service-learning project?

How will I help the youth identify the school/student needs?

How will I help the youth identify academic outcomes?

What preparation will the students need to be both successful and safe in implementing the Students Serving Students service-learning project? What skills and knowledge will the students need?

What can I do to build a sense of team with my students?

What context or social issues will the students need to understand?

What roles and responsibilities will need to be understood before we begin?
