

DROPOUT PREVENTION WALKABOUT

Walk around the school building/campus.

Make a list of Assets and Needs related to the issue of Dropout Prevention.

Assets (Positive Things About Your School)	Needs (Things At Your School That Could Be Improved)

Guidance for this activity:

Imagine that you went to a great school where all students love their school and never drop out. What type of school is it? Does your school have those qualities? What challenges does your school have?

Using the web site www.dropoutprevention.org, research why students drop out of school and reflect upon whether your school or the students have any of these issues.
