Cheating in the News

ABC News: Cheating Crisis in America's Schools

CBC News: Why Student Cheating is Rampant

New York Magazine: Cheating Upwards

CNN.Com: Keep Kids from Cheating in School

The news is not all bad . . .

The 2012 Report Card on the Ethics of American Youth found lower percentages of students who cheated—down from 59% in 2010 to 51% in 2012*

http://charactercounts.org/programs/reportcard/2012/

The gap between students' belief and their behavior . . .

... Lets us know that there is an opportunity for us to teach the students how (and why) to do something that they believe is important.

The "20/60/20" Observation:

20% 60% 20%

Won't try Might try Will try to Cheat to Cheat to Cheat

Can't: Can be persuaded: Can:

"Not an option" Asks why not? "Not a problem"

Students themselves are unhappy about the pervasiveness of cheating . . .

"It's important to get the message out to students that cheating is just a short—term solution, and that it's just not going to keep working out."

~Student opinion writer, *Berkley High Jacket*http://www.bhsjacket.com/2012/pervasive_culture_cheating_must_change

Engagement

Engagement:

Consider cheating one of the measurements of engagement. Engaged learners are less likely to cheat (or to drop out).

- Engagement
- Community

- Engagement
- Community

One of the most significant factors in students' decisions about cheating is the way they understand the expectations and mores of the community. If cheating is seen as unacceptable by the peer group, it is less likely to occur.

Remember:

Preventing cheating ≠ Developing Integrity

Remember:

Preventing cheating ≠ Developing Integrity

Integrity is an internal quality that must be developed by each person for him/herself.

Remember:

Preventing cheating ≠ Developing Integrity

Integrity is an internal quality that must be developed by each person for him/herself.

Communities can, however, greatly assist in the process.

Concrete Steps Toward Building Communities of Integrity*: Phase I

1. Talk to other members of your school community to begin to gauge attitudes and assumptions about integrity.

- 2. Consider taking a survey of students and faculty to gain more insight.
- 3. Identify potential "integrity leaders."

*These steps are based on strategies developed by Tricia Bertram Gallant of ICAI

Concrete Steps Toward Building Communities of Integrity*: Phase II

- 1. Review policies, practices, and survey results (if available) to identify foci for action.
- 2. Revise (or compose) policies that support learning and developmental goals related to integrity.
- 3. Develop resources that support integrity goals.

*These steps are based on strategies developed by Tricia Bertram Gallant of ICAI

Concrete Steps Toward Building Communities of Integrity*: Phase III

- 1. Communicate to faculty, staff, and parents the goals and strategies of the integrity efforts.
- 2. Share teaching strategies with teachers through workshops, discussions, and sharing of resources.
- 3. Continue to assess the integrity climate regularly and adjust efforts based on the results of the assessments.

*These steps are based on strategies developed by Tricia Bertram Gallant of ICAI

 Shaped by our expectations and messages about what is important

- Shaped by our expectations and messages about what is important
- Concerned with peer (and other's) acceptance

Testing all sorts of boundaries

Educators

- Educators
- Focused on capacity-building rather than "catching and punishing"

- Educators
- People who understand long-term goals and appreciate that any school community's collective fate is the responsibility of all of its members

- Educators
- Members of a society that still treats cheating as a "big deal"

- Educators
- People who can, together, promote, establish, and nurture communities of integrity

Thank you!
