

Student Name _____ Group Name _____

You have 50 points for each member of your group, including yourself. For instance, if your group has 2 members, you have 100 total points to assign. You must assign points to yourself as well as your other group members. This is on a 100 pt. grading scale, therefore you must decide who earned the best grade amongst your group. For instance, if you give 50 points to yourself and everyone else, this is averaged in as a 50 for your grade. This is to force you to be objective. Comments MUST be included and should reflect the point values assigned to the particular member.

Group member being evaluated _____
